

Audiso : The Future of Unmanned Audiology

Beyond the limits of human specialists — the unmanned AI clinical platform completing the **Digital Transformation (DX)** of the global hearing-aid market.

1,000K+ Clinical Records

KOLAS (ISO/IEC 17025) Accredited

On-device AI

CES · KIMES · WCA 2026 · CES (Consumer Electronics Show, Las Vegas) · KIMES (Korea International Medical & Hospital Equipment Show) · WCA (World Congress of Audiology)

Why Audiso's Unit Economics Win in the Hearing Industry

A three-tier engine built on clinical technology: **Cash · ARR · Asset** — hardware funds the runway, subscriptions lock in the network, data compounds the M&A moat.

TIER 1 · INITIAL CASH

WithHear kiosk sale

Immediate cash flow · gate into hospitals & public health

\$7.2K–\$21.7K

list ASP / unit · v2 \$7.2K (≈₩10M) · v3 \$21.7K (≈₩30M) · target contribution ≥50% GM at volume

TIER 2 · RECURRING ARR

Center CRM package

Sticky software revenue · platform lock-in

\$72 / mo

/ center (≈₩100k) · remote-managed subscription · SaaS-class gross margin ≥80%

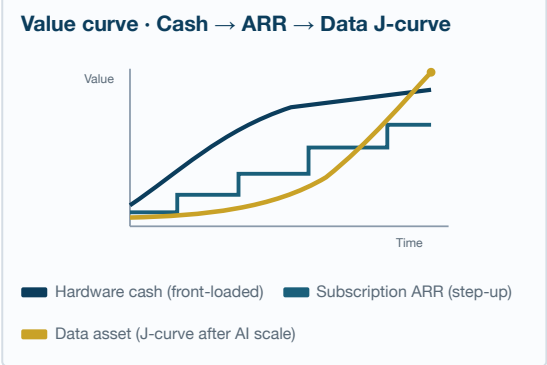

TIER 3 · STRATEGIC ASSET

Clinical hearing dataset

AI learning fuel · global M&A rationale

1,000K+

structured records · peer-reviewed AI & ISO-aligned norms

ARR scale simulation (\$72 / center / month · ≈₩100k)

Partner centers	30 (live KR mesh)	100	300
Monthly	~\$2.2K	~\$7.2K	~\$21.7K
ARR (USD)	~\$26K	~\$87K	~\$261K
≈ KRW ARR	₩36M	₩120M	₩360M

FX illustrative at ≈₩1,380/USD. Subscription is a **remote-managed, ops-efficiency tool** (lead routing + chart automation + remote kiosk management) — negotiable, designed for low churn once the CRM workflow embeds.

Hardware ASP from KR commercial list — WithHear **v2 ≈\$7.2K (₩10M)** (KFDA Class II · GMP · ISO 13485 · Innovation-Procurement listed) and **v3 ≈\$21.7K (₩30M)** (adds otoscope + AI hearing-prediction). Contribution/GM figures are **scale design targets for partner diligence**, not audited historical GAAP. Live footprint: 30+ CRM-linked centers (Korean Air, KT, Davich, Severance, Cochlear, Wonju City...) · 1,000,000+ structured hearing records · peer-reviewed AI (J Clin Med 2025).

Cash: Per-kiosk margin self-funds Audiso runway and is the fastest gate into nationwide public-health and hospital networks.

ARR: ₩100k/mo is priced as a cost-reduction CRM — efficiency-led retention, not lead spam.

Data: 1,000K+ curated records train monthly AI upgrades and give Tier-1 OEMs a concrete M&A thesis.

Investment Thesis

Audiso is a **clinically grounded hearing-health platform** built by an ENT professor-CEO on two decades of university-hospital research, nationally governed reference data, and Korea's only private-sector **KOLAS-accredited audiometer calibration laboratory**.

1. Data moat

Director, Korean Hearing Reference Data Center. 1,089 PTA + 72 ABR normative standards. 1,000,000+ structured hearing records. ISO TC43 WG1 participation. Peer-reviewed AI audiometry (J Clin Med 2025; Am J Audiol 2026).

2. Full-stack ecosystem

Four connected products — screening (WithHear), consumer understanding (Modoo), wellness nutrition (Peacetop), and digital rehab (MindTone) — deployable as a bundle or licensed module-by-module.

3. Global-ready validation

CES 2026 (Las Vegas consumer-tech stage) · KIMES 2026 (Seoul medical-device trade fair) · WCA 2026 Seoul dedicated booth (World Congress of Audiology — global audiologist peer congress). 30+ Korean hearing-center CRM network (Korean Air, KT, Davich, Severance, Cochlear...). EN/JA/ZH B2B showroom (AudiMall). Active US/EU outbound to Tier-1 OEM ICP.

4

Integrated product layers

1,089

Korean PTA reference standards

1,000K+

Structured hearing records

50+

SCI/SCIE publications

30+

Partner hearing centers (KR)

WHY GLOBAL LEADERS SHOULD CARE

- **Strategic narrative:** Capability gap matrix · 30+ partner economics · build-vs-buy must-have positioning for Tier-1 OEM M&A.
- **Asia execution gap:** Western OEMs announce DTx and kiosk strategies — Audiso offers KOLAS-backed deployment infrastructure already live in Korea.
- **Open innovation fit:** White-label AI screening, SaMD rehab modules, and calibration IP — not commodity hardware resale.
- **Professor credibility:** CEO Young Joon Seo, MD, PhD — 1,350+ ENT surgeries; Minister of Health & Welfare Award (2025); MOTIE Awards (2019, 2024).

University-hospital research engine behind the platform

Audiso's commercial products are not spin-offs from a generic health-tech incubator. They emerge from the **Yonsei University Wonju Severance Hearing Rehabilitation Research Institute** (청각재활연구소) — a professor-led clinical research base with a defined path toward national hearing-health data leadership.

INSTITUTIONAL POSITIONING

- **Specialized research institute track:** National Strategic Technology (Advanced Bio) specialized research institute applicant (December 2023)
- **Vision — Hearing Health Data Cluster:** Domestic Top-1 hearing health data operator · Asia hub · WHO national hearing report pathway · ISO TC43 Korean norm development
- **Director:** Prof. Young Joon Seo — Korean Hearing Reference Data Center (since 2017) · Research Institute of Hearing Enhancement, Yonsei University

THREE-LAB OPERATING STRUCTURE

Hearing Lab Clinical audiology research, normative standards, and translational hearing science. smilesnail.org/hearing-lab	HeAD Lab Hearing data engineering, structured record pipelines, and AI model development. smilesnail.org/head-lab	Audiso Commercialization Product engineering, KOLAS calibration lab, WithHear kiosk, and global BD. smilesnail.org/audiso
---	--	--

CES 2026 GLOBAL DEBUT

At **CES 2026** (Las Vegas), Institute Director **Prof. Young Joon Seo** personally unveiled the WithHear AI kiosk on the Gangwon State pavilion — presenting "*WithHearing — AI-based Kiosk Audiometry*" and "*Audiology with ISO*" to a global audience.

- **Global validation:** unmanned AI screening demonstrated on the world's largest consumer-tech stage
- **Research-business fusion:** 50+ SCI/SCIE papers · IP in audiogram digitization & AI audiometry
- **Tech transfer:** national reference data → WithHear norms → Modoo funnel → MindTone rehab

A \$40B+ hearing market shifting to platform models

Global hearing-aid manufacturers and distributors face converging pressures: aging populations, OTC expansion, digital therapeutics (DTx), retail kiosk screening, and AI-driven triage. Winners will own **data + screening + rehab** — not devices alone.

STRUCTURAL TRENDS AUDISO ADDRESSES

Trend	Industry signal	Audiso response
Staff-free screening	Retail & occupational health demand 3-minute triage	WithHear 2.0 — AI kiosk, KOLAS-calibrated norms
Consumer funnel	OEMs need digital lead gen before clinic visit	Modoo Hearing — free app/web, center matching, 4.9★ App Store
Wellness adjacency	Hearing health beyond amplification	Peacetop Triple Care — KFDA functional food, ear-vascular-nerve nutrition
DTx & SaMD	Tinnitus & rehab as software medical devices	MindTone T Care — app + sensory device, ~10 min/day home protocol
Asia expansion	Global OEMs seek local clinical partners	Yonsei hospital network + national reference data + WCA/CES validation

TARGET PARTNER PROFILES (ICP)

Tier 1 — Global OEM

- Starkey · GN Resound · Demant (Oticon) · Sonova
- Use case: licensing, co-development, strategic M&A

Tier 2 — Scale distributors

- WS Audiology · Amplifon · regional med-device networks
- Use case: territory exclusivity, portfolio differentiation

One ecosystem — four connected solutions

"Combine nationally certified data with AI and digital rehabilitation to set a new global standard in hearing healthcare."
— Audiso Vision · audimall.vercel.app/en/about/

LAYER 1 · SCREEN

WithHear 2.0

3-min AI kiosk · hospitals · retail · workplaces · ISO-aligned hearing data

LAYER 2 · UNDERSTAND

Modoo Hearing

Free smartphone/web test · simulation · expert chat · center routing

LAYER 3 · NOURISH

Peacetop Triple Care

CoQ10 · Ginkgo · Vitamins D/B6/B12 · post-screening wellness SKU

LAYER 4 · REHABILITATE

MindTone T Care

Digital tinnitus & hearing rehab · app + device · SaMD pathway

INTEGRATION SURFACES (LIVE TODAY)

- **AudiMall** — Global B2B showroom (EN / JA / ZH): audimall.vercel.app
- **Audiso CRM** — 30+ hearing-center referral terminal network in Korea
- **Modoo web/app** — moduhearingaids.vercel.app · App Store 4.9★
- **Peacetop store** — peacetop.store (Korean e-commerce)
- **Research hub** — xr.audiso.co.kr (CEO clinical & research presence)

PARTNERSHIP MODELS

Model	What partner receives	Typical buyer
Distribution	Territory review · bundle deployment · CRM lead flow	VP Partnerships · BD Director
Technology licensing	AI norms · kiosk stack · SaMD modules · white-label	Head of Licensing · Corp Dev
Co-development	Asia clinical validation · ISO reference data integration	Director Innovation
M&A / strategic	Four-layer IP portfolio + KOLAS lab + data center	Director M&A

The Audiso Advantage — Closing Audiology's Digital Gap

Why incumbent DX still stops at hearing-aid hardware sales — and where Audiso sits instead.

THE STRUCTURAL PAIN POINT

Why has global hearing DX remained stuck at device sell-through? Tier-1 OEMs are optimized for *fitting and shipping hardware*. A staff-free, preventive screening system that resolves demand *before* the clinic visit is economically awkward for a P&L that grows with device units. Prevention that keeps patients out of the store looks like self-cannibalization — so product roadmaps stay hardware-first, with apps bolted on as accessories.

Incumbents are built to sell hearing aids. Audiso is built to own the diagnostic data layer that decides who needs care — and when — before the aid is ever opened.

CAPABILITY MATRIX

Dimension	Global HW OEMs Starkey · Sonova · GN · Demant	Typical hearing AI startups	Audiso
Clinical / trust data	Western / catalog norms; limited Asia population adaptation	Small cohorts · often unpublished	KOLAS lab + 1,089 Korean PTA norms · ISO 7029 peer comparison
Core asset	Manufacturing & channel for devices	Fragmented apps / models	Data + hardware + software in one value chain
Diagnostic infrastructure	Hospital / franchise clinic-centric	Online screening only	WithHear unmanned kiosk net + Modoo funnel + CRM
Medical grounding	Brand / marketing validity	Tech narrative, thin clinical ownership	Professor-run institute · 50+ SCI · ~1,000k structured records

WHERE VALUE POOLS SIT

LEGACY · RED OCEAN Hardware-optimized OEMs Sonova · Starkey · GN · Demant — world-class devices, weak incentive to build population-scale preventive DX that reduces walk-in volume.	FRAGMENTED ATTEMPTS Hearing AI / consumer apps Speed and UX without accredited calibration, national norms, or a professor-owned care network — hard to survive diligence.	AUDISO · FULL STACK Data-first preventive ecosystem Three gears locked: KOLAS metrology · national clinical data · deployable AI (WithHear / Modoo / MindTone). KOLAS Clinical data AI stack
---	---	---

Global leaders are extraordinary at selling hearing aids. They do not yet own the standard for pre-visit care. Audiso's KOLAS-backed diagnostic layer is why an acquisition or deep license is strategic — not optional — for Asia execution.

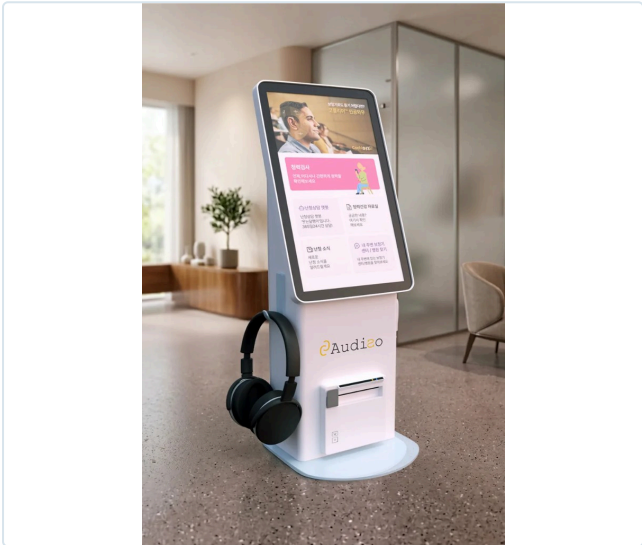

WithHear 2.0 — AI Hearing Screening Kiosk

Staff-free · 3-minute · Built on KOLAS-calibrated national hearing data

- ISO/IEC 17025 data
- CES 2026
- KIMES 2026
- WCA 2026 Seoul

WithHear transforms any site into a **self-service hearing screening node** — age- and sex-matched comparison against 1,089 Korean national PTA reference standards.

HARDWARE & SOUNDPROOF BOOTH

WithHear kiosk · 21.5" FHD · stand-alone · KO/EN UI

WithHear 3.0 · BNJ-3000 · Hearing Screening Kiosk

Thermal printer · professional otoscope · closed-back headphones · KO/EN/MN UI. Booth: tempered glass · flame-retardant interior · ventilation · built-in seating.

KIOSK EDITIONS & PRICING (USD)

Edition	WithHear v2 · Class II	WithHear v3 · Premium
Price / unit	\$7.2K (≈₩10M)	\$21.7K (≈₩30M)
Diagnostics	AI pure-tone screening · KOLAS-calibrated national norms	All of v2 + professional otoscope + AI hearing-prediction diagnosis
Regulatory	KFDA Class II · GMP · ISO 13485 · Innovation-Procurement listed	Premium diagnostic build on the certified v2 base
Operations	Remote-managed — monthly subscription available (terms negotiable), converting CAPEX into predictable OPEX for partners.	

B2G pilot→purchase · modular SaaS (AI eardrum, risk models, cloud reports) · white-label kiosk + national norm data. Live: audimall.vercel.app/en/withhear/

Field-proven across Korea's most demanding environments

WithHear is not a lab prototype. It is deployed with **flagship enterprises, tertiary hospitals and public institutions** — and each vertical generates a distinct stream of structured, real-world hearing data that continuously sharpens Audiso's AI.

DEPLOYMENT PARTNERS BY USE-CASE

NOISE-EXPOSED WORKFORCE Korean Air · Asiana Airlines Crew & ground-staff hearing surveillance in high-noise operations	CORPORATE WELFARE KT Employee hearing-health benefit deployed at enterprise scale
SENIOR-FRIENDLY RETAIL Davich Optical Elderly-accessible screening across a national optical chain	HEARING-LOSS PATIENTS Severance · Seoul Asan Medical Center Tertiary-hospital outpatient screening pathways
COCHLEAR-IMPLANT CARE Cochlear Candidate identification & implant follow-up screening	PUBLIC / CIVIL SERVICE Wonju City Hall Walk-in screening for general citizens & civil-service visitors
STUDENT HEARING HEALTH Yonsei Univ. Health Lounge Campus screening for youth hearing surveillance	GLOBAL OUTREACH Mongolia First Hospital Overseas hearing-health program & export beachhead

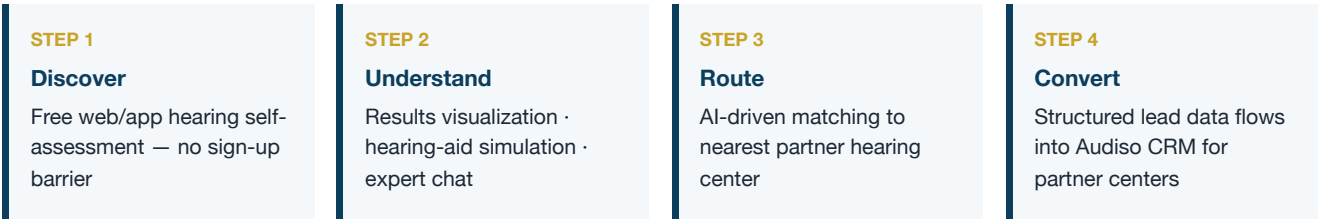

Each vertical is a different data stream — occupational, geriatric, clinical, pediatric and cross-border — compounding into the **1,000,000+ record moat** that no single-channel competitor can replicate.

Modoo Hearing — Consumer & Web Hearing Intelligence

Free funnel · Clinical routing · AI matching algorithm

- App Store 4.9★
- Free web + app
- Center matching
- Lead CRM integration

CONSUMER FUNNEL ARCHITECTURE

VALUE PROPOSITION

Modoo is the **digital front door** of the Audiso ecosystem — capturing hearing-aware consumers before they enter a clinic, and routing them to partner centers with structured data. Designed by a 20-year ENT professor with algorithms grounded in national reference standards.

CORE CAPABILITIES

- Smartphone & web-based hearing self-assessment (free tier)
- Hearing-aid simulation · results sharing · nearby center discovery
- AI-driven lead matching and premium clinical report tiers
- Integrates with Audiso CRM — 30+ partner hearing centers in Korea

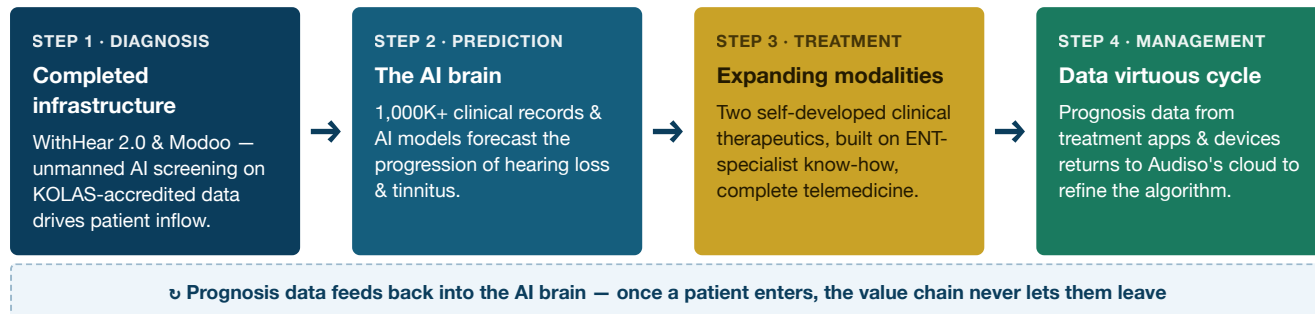

PARTNER VALUE

For global distributors: Modoo provides a **white-labelable consumer funnel** that feeds your clinic network with pre-qualified, data-rich leads — the missing link between marketing spend and fitting-room conversion.

Live: moduhearingaids.vercel.app · apps.apple.com/kr/app/모두의-보청기/id6476432937

Completing the Care Cycle — from diagnosis to treatment

On a **completed AI diagnostic infrastructure**, Audiso layers its own proprietary clinical **Treatment Modalities** — turning a diagnosis platform into a full-cycle, telemedicine-ready hearing solution.

TREATMENT MODALITIES — CLINICAL THERAPEUTICS & REHABILITATION

"A diagnostic AI alone cannot beat the global giants — a true platform needs the answer to treatment. On top of our completed unmanned diagnosis & prediction infrastructure, Audiso adds MindTone (DTx) and Peacetop (clinical nutrition) as treatment modalities, so patients experience the entire cycle — diagnosis, personalized treatment and follow-up — without ever visiting a hospital."

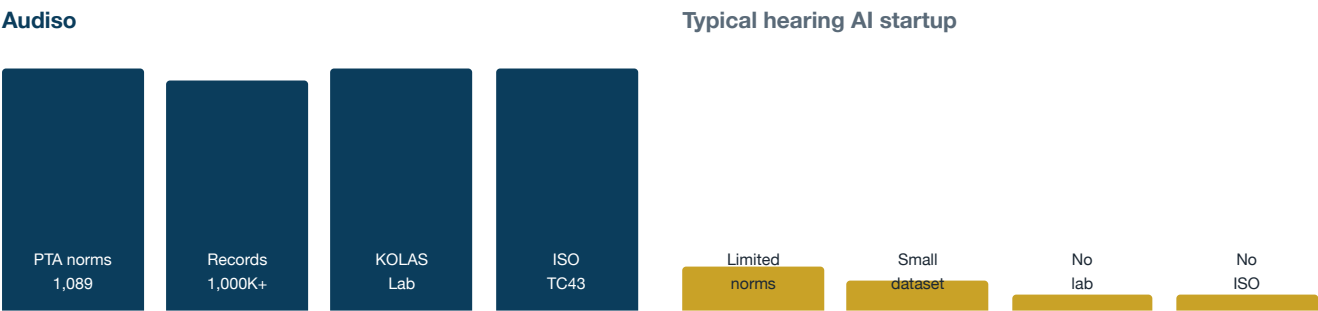

The reference-data advantage

Most hearing AI startups train on scraped or synthetic data. Audiso's algorithms are grounded in **nationally governed Korean hearing reference standards** produced under the Korean Hearing Reference Data Center — directed by CEO Prof. Seo since 2017.

QUANTIFIED CLINICAL ASSETS

Asset	Audiso	Typical hearing AI startup
Pure-tone audiometry norms	1,089 reference standards	Limited or synthetic datasets
ABR reference standards	72 norms	Not available
Structured hearing records	1,000,000+ (multi-year lifelog platform)	Small proprietary samples
KOLAS calibration lab	Yes — ISO/IEC 17025	No accredited lab
ISO TC43 participation	Yes — WG1 member	No standards governance
Audiogram digitization	Proprietary conversion software	Manual or absent
ENT surgical depth	1,350+ procedures	No clinical operator
Publications	50+ SCI/SCIE	Pre-print or none

COMPARATIVE DATA DEPTH

FLAGSHIP PUBLICATIONS (CITABLE)

- Yoon CY et al., *J Clin Med* 2025 — AI-based prediction of bone conduction thresholds from air-conduction audiometry
- Lee D et al., *Am J Audiol* 2026 — Korean normative thresholds ages 20–79 vs. ISO 7029:2017
- Lee HS et al., *Otol Neurotol* 2026 — Osia 2 system prospective clinical outcomes

Audiogram digitization pipeline: Proprietary software converts audiogram image files into structured data for reference-standard comparison — enabling legacy paper records to enter the national data cluster.

KOLAS accreditation — the calibration moat

Korea's **only KOLAS-accredited audiometer calibration laboratory (ISO/IEC 17025)** in the private hearing-health sector underpins every product layer. This is the credibility bridge German and UK buyers expect — and US OEMs need for SaMD diligence.

Nationwide calibration traceability

Audiso operates calibration traceability for the partner audiometer network across Korea — ensuring screening devices in hospitals, retail chains, and public-health sites produce **metrologically verifiable hearing data**, not uncalibrated consumer-grade output.

- ISO/IEC 17025
- ISO TC43
- KFDA
- SaMD pathway

REGULATORY POSITIONING BY PRODUCT

Product	Status	Global BD message
WithHear 2.0	Screening device · KOLAS-calibrated data pipeline	Lab-verified AI — not brochureware
Modoo Hearing	Wellness / triage app · clinical validation	Consumer funnel with ENT-designed algorithms
Peacetop	KFDA health functional food	Regulated wellness SKU for retail channels
MindTone T	SaMD-ready software medical device path	DTx portfolio extension for OEM partners

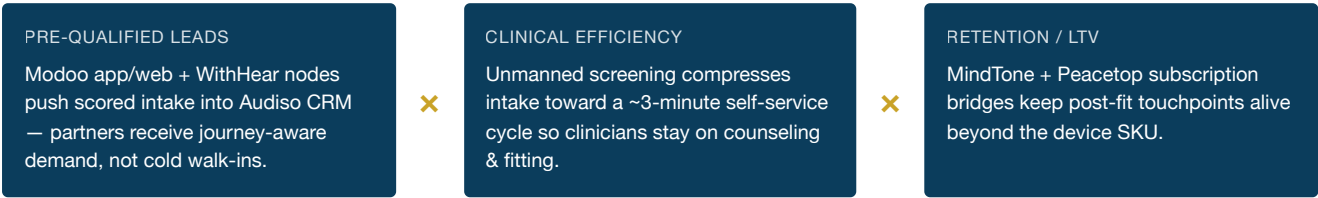

DATA ROOM (QUALIFIED INBOUND)

- Full KOLAS scope certificates & calibration SOPs
- IP-R&D strategy report (Dec 2024) — digital twin hearing test, patent portfolio summary
- WithHear English product catalog PDF
- MindTone technical dossier (on request)

The Audiso Business Engine — 30+ Clinical Partners

Not a box supplier: a revenue engine that compounds inside hearing centers — live with partners such as Korean Air, Asiana, KT, Davich Optical, Severance, Seoul Asan, Cochlear, Wonju City & Mongolia First Hospital.

PARTNERSHIP SUCCESS EQUATION

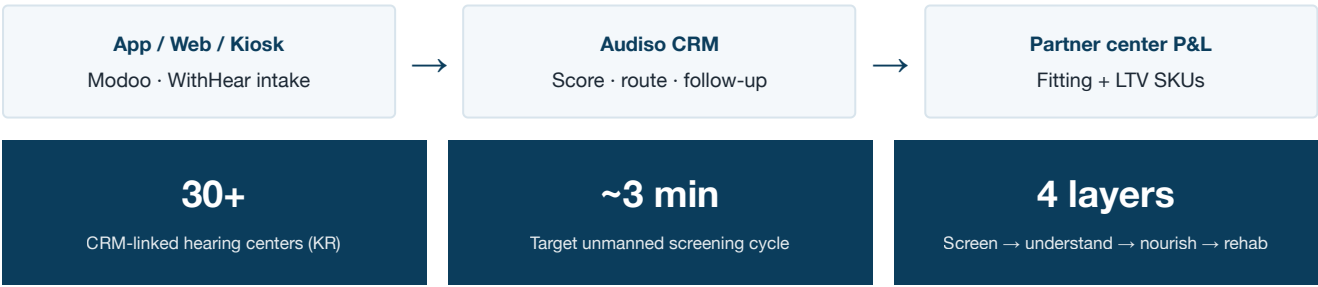

Audiso Partnership Value = Leads × Efficiency × Retention

IMPACT SNAPSHOT (NETWORK OPERATING MODEL)

Lever	What partners experience	Evidence posture
Lead quality	Platform-sourced visitors arrive after digital screening / intent signals — higher consult readiness vs. cold advertising traffic	Modoo 4.9★ funnel · CRM routing to 30+ centers
Intake time	WithHear self-service screening targets ~70% less staffed intake time vs. a traditional chair-side first pass	3-min design cycle · kiosk/booth deployment verticals
Lifetime value	HA sale becomes the mid-point: rehab device + functional nutrition reopen visits and recurring revenue	MindTone SaMD path · Peacetop D2C 4.9★ store

DATA → CLINIC MONETIZATION LOOP

When partners earn more per chair-hour, Audiso earns with them. That win-win is the lock-in — switching means losing both lead supply and post-fit SKU rails.

Global stage · Local network · Active pipeline

CONGRESS & EXHIBITION VALIDATION

CES

2026 Las Vegas · Consumer Electronics Show

KIMES

2026 Seoul · Asia medical-device fair

WCA

2026 Seoul · World Congress of Audiology

WCA = World Congress of Audiology (ISA) — the field's premier biennial scientific meeting. WCA 2024 Paris: Osia 2 outcomes · Innovation Session.

KIMES = Korea International Medical & Hospital Equipment Show (Asia hospital/device buyers).

Commercial footprint (Korea)

- **30+ hearing centers** on Audiso CRM network — incl. Korean Air, KT, Davich, Severance, Cochlear, Wonju City
- **Modoo** — 4.9★ App Store rating · active free-user funnel
- **WithHear** — B2G installations · hospital & public-sector pilots
- **Peacetop** — 4.9★ Naver Smart Store · D2C channel

GLOBAL BD PIPELINE (JUL 2026)

AWARDS & RECOGNITION

Minister of Health and Welfare Award (2025) · MOTIE Awards (2019, 2024) · Yonsei University Research Excellence Award · National science & technology honoree dossier (2025)

Young Joon Seo, MD, PhD

CEO, Audiso Co., Ltd. · Professor & Chief, Otorhinolaryngology, Yonsei University Wonju College of Medicine

WHY CEO-LED MATTERS FOR PARTNERS

Global hearing M&A and licensing deals fail when the counterparty is a sales team without clinical depth. Prof. Seo personally leads Audiso's product architecture, reference-data science, and partnership conversations — the same credibility presented at the **World Congress of Audiology (WCA) 2026 Seoul** to international audiologists — not a local trade-only booth.

CREDENTIALS SUMMARY

- Director, Korean Hearing Reference Data Center (2017–present)
- Director, Research Institute of Hearing Enhancement, Yonsei University
- ISO TC43 WG1 member · Research Director, Korean Audiological Society
- 1,350+ ENT surgeries including cochlear & BAHA implants
- Adjunct Professor, Yonsei Graduate School of Digital Healthcare
- 50+ SCI/SCIE publications · KOLAS-accredited audiometer calibration laboratory (ISO/IEC 17025)

REGIONAL POSITIONING (OUTBOUND-TESTED)

Region	CEO message anchor
United States	Hospital hearing-data work translated into deployable clinic tools — peer-reviewed, not pitch-deck
Germany	ISO-aligned reference data + KOLAS lab — the rigor German audiology networks expect
United Kingdom	Published normative data & clinical AI — evidence for NHS/private network diligence
Japan	National hearing reference center + university hospital R&D — JA AudiMail & PR Times ready

xr.audiso.co.kr · audiso.seo@gmail.com

Why We Are a Must-Have Layer for Global Leaders

Audiso is the intelligence and Asia evidence layer that completes the next decade of OEM platforms — not another catalog SKU.

BUILD VS. BUY

Internal R&D (OEM alone)

Recreate a KOLAS-grade metrology stack, population norms for Asia, and a commercially shipping AI screening/rehab engine: **multi-year timelines** and **clinical CAPEX on the order of \$70M+ (₩100B+)** — with still-unproven partner-clinic adoption.

5+ years · \$70M+

Internal build

Audiso partnership / acquire

University-hospital research line already translated into products: ~20 years of clinical leadership · ~1,000,000 structured hearing records · peer-reviewed AI & ISO 7029 work · live KR network.

Ship-ready stack

Partner / buy

STRATEGIC MOAT — NOT “JUST SOFTWARE”

When hardware growth slows, OEMs need a digital clinic and intelligent consultation layer that does not dilute brand clinical risk. Audiso packages that layer with accredited calibration, national norms, and CEO-professor ownership — the diligence surface Sonova-class buyers actually need.

VISIONARY PATH

2026–2027 · VALIDATE

Clinical & network proof

Data standardization in the field · 30+ partner CRM mesh stress-tested · global congress presence: CES (Las Vegas consumer tech) / KIMES (Asia medical-device show, Seoul) / WCA (World Congress of Audiology).

2027–2028 · PLUGIN

Default OEM module

Diagnosis / fitting-assist / consultation AI embedded into Tier-1 global channel as a default Asia/DX plugin.

EXIT WINDOW

Integrate HW + SW

M&A or deep strategic partnership that fuses Audiso's intelligence layer into the OEM platform end-to-end.

We are not merely a supplier.
We are the intelligence layer that can define the next decade of global hearing health.

Partner with Audiso

We welcome structured conversations with global OEMs, distributors, and digital-health platforms. Typical diligence path: **intro call (30 min)** → **product demo** → **data room** → **term sheet discussion**.
